Commenti: The CK 64 is a light and fast catamaran. Claude Kermol took profit of his 30 years experience in ship building and charter operation of large catamarans to design a reliable boat able to sail around the world in remarkable comfort and safety conditions. The use of Sealium (high performance aluminium alloy) and honeycomb for the furniture preserves the displacement of the boat, in spite of the full technical equipment of this unit designed by Naço Design office in Paris.
