评论: 34.75 metre Sunreef sailing catamaran Che. Built in aluminium by Polish yard Sunreef to an in-house design and Bureau Veritas classed, she was delivered in 2010 and has since built a superb reputation as a charter yacht. Accommodation is for up to eight guests in four cabins consisting of a master suite and three twins, all with entertainment centres, 22-inch LCD television screens and full en-suite facilities.

The 12.8 metre beam saloon houses a large dining area for up to eight guests to port comprising a sofa and large dining table and a separate lounge area housing a smart coffee table and storage cabinets. To starboard, alongside the dining area, is a spacious and fully equipped professional galley with ample storage, separated from the saloon by a glass wall and wooden blinds, ensuring guest intimacy.

A large bar is also located to starboard, along with an entertainment centre including a 55-inch LED Samsung television screen and a Bose stereo surround sound system. Forward is an internal helm station equipped with a full suite of navigation equipment and two captain 's chairs.

On deck, a huge cockpit comes with couches and a table for all fresco dining, sheltered by a Bimini top. Twin 455hp Cummins diesel engines, one in each hull, give her a cruising speed of 12 knots and a range of 3,500 nautical miles.
