Comments: LESS 83 is a rare yacht and represents a great opportunity to purchase a proven oceanic passage trawler. The yacht is the result of dedicated research by a talented team that achieved what many have promised, but few have accomplished; a motor yacht truly able to sail in any weather for extended periods of time in complete safety and comfort at sea. LESS 83 has great stability, with a hull speed of 11.7 knots. The range represents a true oceanic passage, and has been calculated to authorize the distance while not burning fuel to carry fuel. The hull has been carefully designed to minimize drag and provide comfortable sea motion.
