Ref. 1406

€ 490 000

a próximo \$ 606 061

Tipo	Clásico
Propulsión	Motor
Casco	Catamarán
Eslora	18.6m (62')
Manga	7.7m (26')
Calado	1.2m (4')
Construcción	Composite
Motor	2 / Cummins /
Potencia motor	185

Pasajeros	6
Camarote de invitados	2
Tripulación	1

Construido/Refit	2009/-
Astillero	Marc Lombard

Comentarios: ATLANTIC CRUISER 60'. This kind of reasonable **Power catamaran** is probably the future of the power boats. The concept by Marc Lombard (famous French designer) and Daniel Curt owner and engineer is visionary and simple.

This cat built by famous HERVÉ Yard in La Rochelle in composite wood epoxy is a fantastic solution for long and economic range cruising. Modern child of the SANTORINI 65' (Joubert-Nivelt-Prometa), brother of the ETOILE 65' (tested in 2014 during 200nm with 50-60kt of wind !).

This yacht is probably one of the best powered Cat existing on the world market.

In very good condition and fully equipped for long cruises :

Fuel tanks 2x 4600 liters, Generator, Water-maker, Heating, Full electronic package, Bow thruster, Refrigerator & Freezer, Washing machine, Tender, ...

Very confortable at sea, with a very low consumption (1 liter/nautical mile at 7,5 knots), she's not a yacht but a perfect machine for expedition and blue water voyages !
